

What is claimed:

1. A pneumatic paintball gun, comprising:
a gun body having first, second and third bores formed at least partially
therethrough;
wherein the first, second and third bores have respective first, second and
third longitudinal axes;
wherein the first, second and third longitudinal axes are parallel to one
another; and
wherein lines drawn connecting the first, second and third axes in a plane
perpendicularly intersecting the first, second and third axes form a
triangle.
2. The pneumatic paintball gun of claim 1, wherein the triangle is an
equilateral triangle.
